

### What have we been learning?

We have had so much fun this month.

We have explored still life paintings, using various tools to create lines for stems and flowers for our interpretation of daffodils for St David's day and bottles with foam paint to create clovers for St Patrick's Day.

We have celebrated 'world book day' and dressed up with our favourite character and got to enjoy some yummy pancakes with different toppings, including lemon and sugar.

We then had science week, where we made our very own volcano and made it erupt; learning that there are many different volcanos. We explored the parts of a flower, learned about colour mixing with jars and kitchen roll, watching them soak up and mix together.

Finally, we celebrated our amazing mummies and made them a lovely gift, whereby the children could express themselves through paint and planting.

### What's next?

Next month we will be celebrating Easter and making our very own easter bonnets as well as learning about baby animals and Spring.

We will also continue to engage the children in planting; transferring some of our seedlings outside.

### Reminders

Please can we ask you put cooler clothing in your child's bags as the weather is becoming nicer.

Also, any spare clothes you may have, especially bottoms and socks we would love to have at the nursery.

If your child cannot have our sun cream, please can you bring this is, labelled.
