

### What have we been learning?

This month we have been exploring our big emotions through sensory activities. The children have been loving our new cosy corner and looking at our emotion themed books.

We then had a whole week of science, where we explored colour mixing as well as cause and effect of pushing water down pipes and seeing where it comes out and what happens.

We had fun dressing up for world book day and reading some of our favourite stories together.

The children have been really interested in looking for the birds in the garden, so we decided to go on a bird hunt, where the children had the clipboards and checklist and went on the hunt for some birds.

Lastly, we celebrated our wonderful mummies for Mother's Day and hope you all had a lovely, relaxing day!

### What's next?

Next month we will focusing on spring and baby animals, Easter and making our own easter hats as well as celebrating St George's Day.

### Reminders

Please can you remember to bring in weather appropriate garden wear, as the weather is now starting to change.
