

### What have we been learning?

Wow, where has April gone!

We had a wonderful time decorating our own Easter bonnets and taking part in the parade. We also made our own paper mache easter eggs, learning about layering paper and glue, then painting it once it had dried as well as sticking and cutting to make our Easter mosaic.

We have planted lots of seeds, learning about how they grow, capacity and how to care for them correctly.

We enjoyed 'big chef little chef' with Bryan, where we got to make our own cookies, learning about the different ingredients we needed and measuring the right amount. We then had to use our muscles to stir the mixture together.

### What's next?

Next month we will be looking at life cycles, with our book of the month being 'The very hungry caterpillar'.

We will be exploring the different types of bees and making our own beehive using different resources.

We will also be investigating space and the planets, making our own moon scene.

### Reminders

Please can we ask you to put cooler clothing in your child's bags as the weather is becoming nicer and we want to keep the children as cool as possible.

If your child cannot have our nursery sun cream, please can you bring this is, labelled with your child's name.
