

What have we been learning?

Another fun filled month, full of exciting activities.

We made our own Easter bonnets and took part in the parade, where they marched around the room for everyone to see their creation. And what better way to celebrate Easter than for Stitch the rabbit to come and visit us, and the babies absolutely loved him and were so gentle stroking him and giving him some food.

As we have had nicer weather, we have spent a lot more time in the garden, exploring the water and using pipes and guttering to tip the water in and watch the water flow down. We have also got the big sand pit back open, which the babies have spent a lot of time in, practicing their scooping skills.

We have focused on spring, by exploring colours, animals and natural objects using them for crafts and tuff trays.

What's next?

Next month we will be exploring the children's interest whilst still incorporating the outdoors.

They still continue to love animals, so we will be focusing on this.

If you find any spring objects when out on walks, please send them in for us to explore and incorporate within the activities.

Reminders

Please can we ask you to put cooler clothing in your child's bags as the weather is becoming nicer and we want to keep the children as cool as possible.

If your child cannot have our nursery sun cream, please can you bring this in, labelled with your child's name.
